Preparing the workshop · *Qualitative surveys (Social barometer)*

G1 · Proof of Impact

Why this tool matters

Taking the pulse of the city without interrupting it; listening to the quiet, digital murmurs of residents to uncover the invisible emotional geography of the neighborhood.

Evidence we produce

Geolocated qualitative data ("soft GIS") that visualizes community concerns, emotional attachments, and daily mobility patterns directly on a map.

Duration & Material

Duration · 1 month of continuous online collection, 2 weeks of spatial analysis

Material · Map-based digital platforms, GIS software, social media accounts

Reference case

The UrbanSensing project uses User Generated Content (UGC) from social media to map out consumption patterns and citizen perceptions on a neighborhood scale. By allowing residents to share location-based, subjective feedback on a map, planners successfully transition qualitative human experiences into concrete urban planning layers.

Suggested agenda · Brief (10 min) > Method walk-through (15 min) > Animation canvas (60-90 min) > Harvest (20 min)

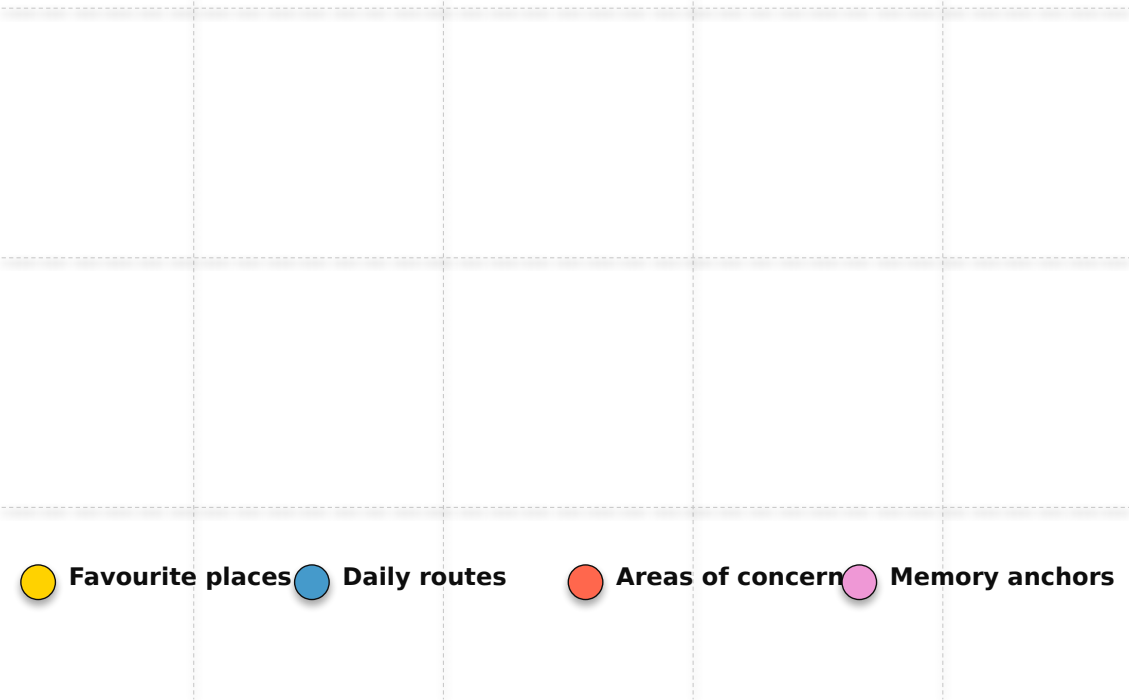

Soft-GIS · geolocated qualitative data

Duration

1 month of continuous online collection, 2 weeks of spa...

Neighbourhood base map

Drop pins for favourite places, daily routes, areas of concern

Open-ended questions

1. What place in this neighbourhood matters most to you?
.....
2. Where do you walk every day? Which detour do you take?
.....
3. Where would you not go after dark · and why?
.....
4. Where would you take a friend visiting for the first time?
.....

Distribution channels

- | | |
|---|---|
| ☐ Project website | ☐ Local social media |
| ☐ QR codes in public space | ☐ Door-to-door printed cards |

Layer the spatial pins on top of your technical urban plans to spot correlations between design and sentiment.

Harvesting our *learnings*

After running the canvas, capture three layers of insight.

What inspires me

Stand-out signals, surprising stories, ideas to remember

How to apply it here

Concrete adaptations to our context, our team, our constraints

What we need to be autonomous

Skills, allies, resources, decisions still to secure

Each participant fills a copy. Then debrief together to surface patterns and next steps.
