Preparing the workshop · *Temporary urbanism prototype*

G2 · Proof of Fit

Why this tool matters

Breaking the paralysis of long-term planning through immediate action; proving to skeptical residents that a hostile asphalt intersection can become a welcoming human square overnight.

Evidence we produce

A low-cost, short-term physical alteration of a public space (e.g., a pop-up parklet, a painted pedestrian plaza) accompanied by data on how the community naturally uses the new configuration.

Duration & Material

Duration · 1 week for installation, 1 to 3 months of temporary testing and observation

Material · Paint, modular seating, mobile greenery, observation grids, user feedback surveys

Reference case

The PopUpUrbanSpaces project across Central Europe utilized tactical urbanism to reclaim streets. In Varaždin (Croatia), a street redesign prototype was tested with temporary materials. Follow-up measurements recorded an asphalt temperature drop from 50°C to 30°C, and on-site surveys confirmed a 95% public approval rate, accelerating the city's commitment to permanent pedestrian-oriented interventions.

Suggested agenda · Brief (10 min) > Method walk-through (15 min) > Animation canvas (60-90 min) > Harvest (20 min)

Quick · cheap · reversible · learn

Duration
1 week for installation, 1 to 3 months of temporary tes...

Quick
days, not months

Cheap
low-cost materials

Reversible
can be removed

Measurable
data-driven learning

Instrumentation · what we measure

Harvesting our *learnings*

After running the canvas, capture three layers of insight.

What inspires me

Stand-out signals, surprising stories, ideas to remember

How to apply it here

Concrete adaptations to our context, our team, our constraints

What we need to be autonomous

Skills, allies, resources, decisions still to secure

Each participant fills a copy. Then debrief together to surface patterns and next steps.
