G2 · Proof of Fit

Why this tool matters

Dismantling the illusion of seamless technology; recognizing that every smooth digital interaction relies on the coordinated, hidden labor of real people and complex administrative structures.

Evidence we produce

A comprehensive operational map detailing the chronological actions of the user (front-stage) directly linked to the tasks performed by staff and digital infrastructure (back-stage).

Duration & Material

Duration · 1 to 2 days of collaborative workshop mapping

Material · Large paper rolls, post-its, Service Design Toolkit templates, stakeholder process data

Reference case

The UNaLAB framework incorporates Service Design Toolkits, including Service Blueprints and Customer Journey Maps. These tools guide pilot sites through the precise detailing of new systems in complex environments, ensuring that both the front-end user experience and the back-end operational mechanics are aligned before deploying smart city or mobility solutions.

Suggested agenda · Brief (10 min) > Method walk-through (15 min) > Animation canvas (60-90 min) > Harvest (20 min)

Service blueprint · swimlanes × phases

Duration
1 to 2 days of collaborative workshop mapping

Phase	Phase 1	Phase 2	Phase 3	Phase 4	Phase 5
User actions					
Touchpoints					
Frontstage					
Backstage					
Support processes					
Pain points					
Opportunities					

Pin pain points and opportunities directly in their phase column. Connect lines of visibility.

Harvesting our *learnings*

After running the canvas, capture three layers of insight.

What inspires me

Stand-out signals, surprising stories, ideas to remember

How to apply it here

Concrete adaptations to our context, our team, our constraints

What we need to be autonomous

Skills, allies, resources, decisions still to secure

Each participant fills a copy. Then debrief together to surface patterns and next steps.
