Regulation

Preparing the workshop · *Urban development contract / PPP structuring*

G4 · Proof of Sustainability

Why this tool matters

Crafting a delicate decades-long pact between public accountability and private capacity, anchoring the relationship in mutual trust and shared risk rather than mere transactional exchange.

Evidence we produce

A finalized Public-Private Partnership (PPP) contract featuring explicit risk allocation, output specifications, payment mechanisms, and dispute resolution clauses.

Duration & Material

Duration · 6 to 18 months of negotiation and structuring

Material · Financial models (Base Case), technical output specifications, legal frameworks, risk matrices

Reference case

The EBRD guides the structuring of PPP contracts by emphasizing that long-term viability requires flexibility. For instance, in toll highway or water treatment projects, contracts must include adjustment mechanisms to handle unpredictable technological shifts or demand changes over a 30-year lifecycle. Proper structuring gives lenders the certainty they need to provide non-recourse project finance.

Suggested agenda · Brief (10 min) > Method walk-through (15 min) > Animation canvas (60-90 min) > Harvest (20 min)

PPP structure · roles · risks · revenues · oversight

Duration
6 to 18 months of negotiation and structuring

Roles public · private · operator	Risk allocation design · build · operate · revenue	Revenue model availability · user-pay · hybrid	Oversight KPIs · audits · clawbacks
---	--	--	---

Risks belong to the party best able to manage them. Always.

Harvesting our *learnings*

After running the canvas, capture three layers of insight.

What inspires me

Stand-out signals, surprising stories, ideas to remember

How to apply it here

Concrete adaptations to our context, our team, our constraints

What we need to be autonomous

Skills, allies, resources, decisions still to secure

Each participant fills a copy. Then debrief together to surface patterns and next steps.
