Preparing the workshop · *Circular economy readiness*

G1 · Proof of Impact

Why this tool matters

Shifting the civic mindset from managing scarcity and waste to recognizing the city as an abundant, regenerative mine of continuous material value.

Evidence we produce

A maturity index scorecard evaluating the city's strategic vision, policy coherence, material loop infrastructure, and stakeholder awareness.

Duration & Material

Duration · 4 to 6 weeks for assessment

Material · Material flow analysis data, waste management statistics, maturity indexes

Reference case

Urban planners use the Circular Economy Maturity Index and frameworks like CE-MAP to assess a city's transition away from linear models. By tracking indicators such as urban metabolism and circular economy finance, cities can evaluate whether their initiatives are creating unintended side effects and determine if their local policies are mature enough to support true resource efficiency.

Suggested agenda · Brief (10 min) > Method walk-through (15 min) > Animation canvas (60-90 min) > Harvest (20 min)

R-strategies · refuse · reduce · reuse · recycle · recover

Duration
4 to 6 weeks for assessment

<i>avoid the resource</i>	Reduce <i>use less of it</i>	Reuse <i>use it again</i>	Repair <i>fix to extend life</i>	Recycle <i>reprocess materials</i>	Recover <i>energy from waste</i>
---	---	--	---	---	---

Higher up the ladder = more value preserved. Climb deliberately.

Harvesting our *learnings*

After running the canvas, capture three layers of insight.

What inspires me

Stand-out signals, surprising stories, ideas to remember

How to apply it here

Concrete adaptations to our context, our team, our constraints

What we need to be autonomous

Skills, allies, resources, decisions still to secure

Each participant fills a copy. Then debrief together to surface patterns and next steps.
