G2 · Proof of Fit

Why this tool matters

Acknowledging that urban truth is plural; it creates a democratic scale where the aesthetic quality of a plaza and the ecological resilience of a neighborhood can be weighed fairly against construction costs.

Evidence we produce

A weighted scoring matrix and ranking report that systematically compares alternative project scenarios against a diverse set of qualitative and quantitative objectives.

Duration & Material

Duration · 3 to 6 weeks

Material · Decision-making software, stakeholder survey data, scoring rubrics

Reference case

The European Investment Bank utilizes a tailor-made MCA tool for planning-led, integrated urban development projects where standard quantitative estimates are challenging. By applying criteria such as "climate resilience" and "social inclusion," MCA translates performance into numerical values to ensure projects meet broad societal objectives. In Milan's Rogoredo area, an MCA was combined with financial analysis to rank 11 alternative regeneration scenarios based on environm...

Suggested agenda · Brief (10 min) > Method walk-through (15 min) > Animation canvas (60-90 min) > Harvest (20 min)

Options × criteria × weighted scoring

Duration
3 to 6 weeks

Criterion	Weight (%)	Option A	Option B	Option C
Cost				
Schedule				
Heritage value				
Climate impact				
Social inclusion				
Economic return				
Risk				
Total weighted score				

Harvesting our *learnings*

After running the canvas, capture three layers of insight.

What inspires me

Stand-out signals, surprising stories, ideas to remember

How to apply it here

Concrete adaptations to our context, our team, our constraints

What we need to be autonomous

Skills, allies, resources, decisions still to secure

Each participant fills a copy. Then debrief together to surface patterns and next steps.
