G2 · Proof of Fit

Why this tool matters

Translating grand civic visions into the ruthless, necessary arithmetic of survival, ensuring that today's promises do not become tomorrow's financial ruins.

Evidence we produce

A detailed Discounted Cash Flow (DCF) spreadsheet yielding the Financial Net Present Value (FNPV) and the Internal Rate of Return (IRR) of the proposed development.

Duration & Material

Duration · 3 to 5 weeks

Material · Financial modeling software (Excel/dedicated platforms), market revenue forecasts, construction cost databases

Reference case

In assessing large-scale infrastructure, the European Commission demands robust financial modeling. Planners establish working capital, track operational profits against replacement investments, and apply a 10% or similar benchmark IRR to determine if an operation can generate enough operating cash flow to be sustainable. Similarly, financial analysis was combined with spatial criteria to appraise the profitability and maintenance costs of reusing the historic Vimercate hosp...

Suggested agenda · Brief (10 min) > Method walk-through (15 min) > Animation canvas (60-90 min) > Harvest (20 min)

DCF model · NPV · IRR · payback

Duration
3 to 5 weeks

NPV

€ ____ M

IRR

__ %

Payback

Harvesting our *learnings*

After running the canvas, capture three layers of insight.

What inspires me

Stand-out signals, surprising stories, ideas to remember

How to apply it here

Concrete adaptations to our context, our team, our constraints

What we need to be autonomous

Skills, allies, resources, decisions still to secure

Each participant fills a copy. Then debrief together to surface patterns and next steps.
