Preparing the workshop · *Territorial foresight / Prospective*

G1 · Proof of Impact

Why this tool matters

Treating the future not as an unavoidable destiny to be feared, but as a malleable landscape that can be shaped through collective civic imagination and bold present-day choices.

Evidence we produce

A set of detailed, localized scenarios mapping out different spatial and socio-economic futures based on varying policy choices and external megatrends.

Duration & Material

Duration · 3 to 6 months

Material · GIS mapping tools, scenario planning matrices, demographic projections

Reference case

In the Puget Sound region (Seattle), urban ecology research labs built rigorous, extensively modeled future scenarios to inform local policies, helping decision-makers visualize the long-term spatial impacts of different land-use allocations. Similarly, foresight methodologies have been deployed in Sub-Saharan Africa to envision territorial adaptations necessary to handle rapid demographic and employment shifts.

Suggested agenda · Brief (10 min) > Method walk-through (15 min) > Animation canvas (60-90 min) > Harvest (20 min)

Four scenarios · 2 axes of uncertainty

Duration
3 to 6 months

Scenario 2x2 matrix

Axis 2:
critical
uncertainty

Scenario A

Defining narrative

Scenario B

Defining narrative

Scenario C

Defining narrative

Scenario D

Defining narrative

Axis 1: critical uncertainty

Harvesting our *learnings*

After running the canvas, capture three layers of insight.

What inspires me

Stand-out signals, surprising stories, ideas to remember

How to apply it here

Concrete adaptations to our context, our team, our constraints

What we need to be autonomous

Skills, allies, resources, decisions still to secure

Each participant fills a copy. Then debrief together to surface patterns and next steps.
