G3 · Proof of Anchoring

Why this tool matters

Transforming global planetary anxiety into precise, localized municipal action, empowering mayors and citizens to become the frontline defenders of a stable climate.

Evidence we produce

A formally adopted Sustainable Energy and Climate Action Plan (SECAP) comprising a Baseline Emission Inventory, a Risk and Vulnerability Assessment, and a clear roadmap of mitigation/adaptation actions.

Duration & Material

Duration · 6 to 12 months for baseline gathering and action planning

Material · CoM reporting templates, local utility data, climate hazard models, emission factor databases

Reference case

The Cluster 'Dora 5 Laghi' in Piedmont, Italy, successfully utilized a Joint SECAP approach. Seven municipalities collaborated to set a collective emission reduction target of 56.9% by 2030. Their plan brilliantly integrated shared territorial actions, like expanding cycling infrastructure and setting up a renewable energy community, with localized municipal actions such as landslide repair and public building efficiency upgrades.

Suggested agenda · Brief (10 min) > Method walk-through (15 min) > Animation canvas (60-90 min) > Harvest (20 min)

SECAP cycle · BEI · vision · actions · monitoring

Duration
6 to 12 months for baseline gathering and
action planni...

Baseline emission inventory

BEI – year 0 reference

Vision & targets

2030/2050 commitments

Actions

mitigation × adaptation

Monitoring

biennial review

Harvesting our *learnings*

After running the canvas, capture three layers of insight.

What inspires me

Stand-out signals, surprising stories, ideas to remember

How to apply it here

Concrete adaptations to our context, our team, our constraints

What we need to be autonomous

Skills, allies, resources, decisions still to secure

Each participant fills a copy. Then debrief together to surface patterns and next steps.
