G2 · Proof of Fit

Why this tool matters

Abolishing the expert-layman divide by physically making things together, treating rigid public policy as a living draft open to continuous, collective improvement.

Evidence we produce

Actionable, physical, or service-based prototypes of policies, spaces, or tools that have been directly shaped and validated by community input .

Duration & Material

Duration · 1 to 3 days of intensive workshops

Material · Large workspaces, prototyping materials (cardboard, 3D models, role-play scripts), whiteboards

Reference case

The GENDER STI Co-Design Labs demonstrate that labs do not only produce tangible objects like engines or software. They are used to collaboratively prototype policies, strategies, and recommendations, generating a "proof of concept" through continuous improvements emerging from real-life tests with direct stakeholder engagement .

Suggested agenda · Brief (10 min) > Method walk-through (15 min) > Animation canvas (60-90 min) > Harvest (20 min)

Lab session · drafts in, prototypes out

Duration
1 to 3 days of intensive workshops

Inputs

What we bring into the room

1

2

5

Treat the policy or service as a draft · always open to collective improvement.

Harvesting our *learnings*

After running the canvas, capture three layers of insight.

What inspires me

Stand-out signals, surprising stories, ideas to remember

How to apply it here

Concrete adaptations to our context, our team, our constraints

What we need to be autonomous

Skills, allies, resources, decisions still to secure

Each participant fills a copy. Then debrief together to surface patterns and next steps.
