# Preparing the workshop · *Living labs (Urban living labs)*

## G2 · Proof of Fit

### Why this tool matters

Turning the living city into an open canvas where residents are not just subjects of research, but active, daily co-creators of their own environment.

### Evidence we produce

A functional, real-world deployment of a solution tested in situ by end-users, complete with documented feedback on its social and spatial performance .

### Duration & Material

Duration · 6 months to 2 years of continuous experimentation

Material · Urban space, physical prototypes, observational forms, social surveys

### Reference case

The FURNISH project in Barcelona utilized a four-phase Urban Living Lab process. They collaborated with Fab Labs to design and fabricate prototypes like the "EDUS Point". These prototypes were then deployed in real urban environments, challenging traditional planning by embedding experimentation into everyday settings and relying on iterative feedback loops between users and designers , , .

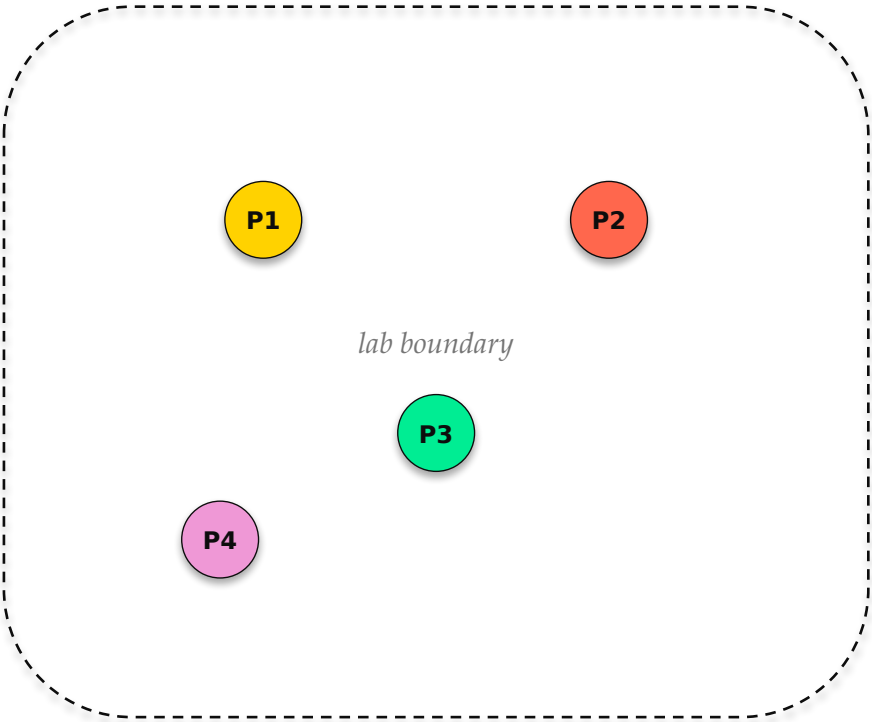

**Suggested agenda** · Brief (10 min) > Method walk-through (15 min) > Animation canvas (60-90 min) > Harvest (20 min)

# Urban living lab · testbed setup & iterations

**Duration**  
6 months to 2 years of continuous experimentation

## Geographic testbed

Trace the boundary, mark prototype deployment points.

## Partnership

**Public agencies**

**Technical experts**

**Local residents**

**Businesses**

## Iteration log

**V1**

**V4**

\_\_\_\_\_

Run for 6 to 24 months. Embed feedback loops between users and designers.

# Harvesting our *learnings*

*After running the canvas, capture three layers of insight.*

**What inspires me**

*Stand-out signals, surprising stories, ideas to remember*

---

---

---

---

---

---

---

---

**How to apply it here**

*Concrete adaptations to our context, our team, our constraints*

---

---

---

---

---

---

---

---

**What we need to be autonomous**

*Skills, allies, resources, decisions still to secure*

---

---

---

---

---

---

---

---

*Each participant fills a copy. Then debrief together to surface patterns and next steps.*
