G1 · Proof of Impact

Why this tool matters

Transforming flat, silent maps into deep, time-traveling tools where the forgotten layers of the city's past become visible beneath the modern streets.

Evidence we produce

An interactive, multi-layered digital map (H-GIS) that superimposes historical cartography, modern topographical data, and intangible community values into a single navigable database,.

Duration & Material

Duration · 3 to 6 months of digital mapping and data entry

Material · GIS software (e.g., QGIS, ArcGIS), digitized historical maps, spatial data

Reference case

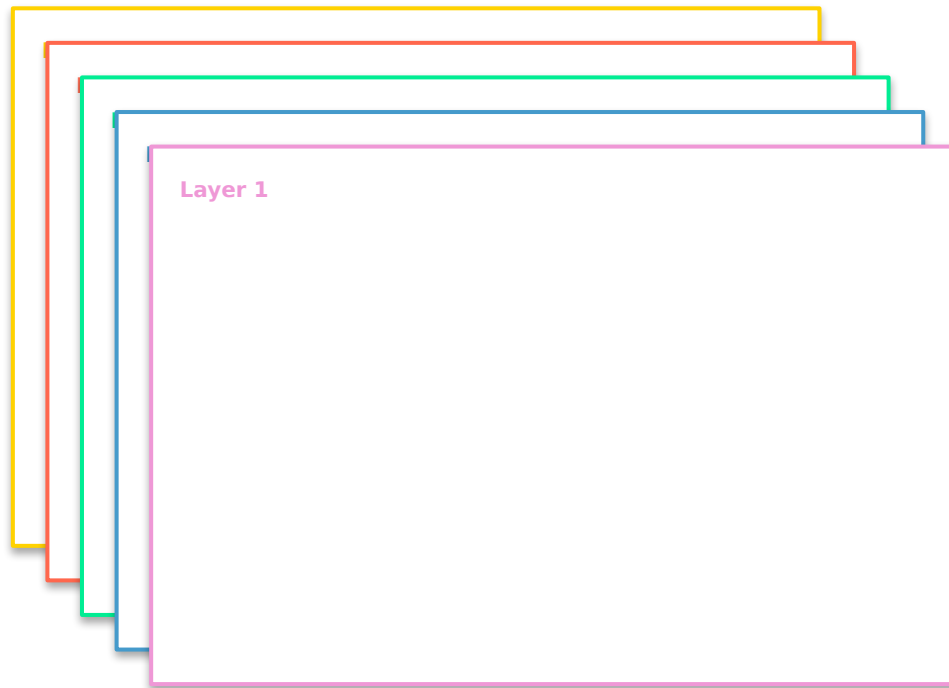

The Protected Urban Planet (PUP) platform, developed jointly by Eindhoven University of Technology and the UNESCO World Heritage Centre, overlaid spatial data with historical and social attributes for nearly 1000 protected areas. By combining multi-scale geographical data with the specific values and threats of each site, it created an interoperable mapping database for heritage monitoring,,.

Suggested agenda · Brief (10 min) > Method walk-through (15 min) > Animation canvas (60-90 min) > Harvest (20 min)

GIS layer stack · isolate · combine · query

Duration
3 to 6 months of digital mapping and data entry

Map preview area

Layer toggles

- ☐ ☐ **Listed monuments**
- ☐ ☐ **Protected zones**
- ☐ ☐ **Archaeological sites**
- ☐ ☐ **Natural reserves**
- ☐ ☐ **Hydrology**
- ☐ ☐ **Risk areas**
- ☐ ☐ **Building age**
- ☐ ☐ **Land use**

Harvesting our *learnings*

After running the canvas, capture three layers of insight.

What inspires me

Stand-out signals, surprising stories, ideas to remember

How to apply it here

Concrete adaptations to our context, our team, our constraints

What we need to be autonomous

Skills, allies, resources, decisions still to secure

Each participant fills a copy. Then debrief together to surface patterns and next steps.
