G1 · Proof of Impact

Why this tool matters

Treating the walls of a city as an open, living archive, where each overlapping layer of brick and mortar reveals the triumphs, crises, and daily labor of the generations who built it.

Evidence we produce

A chronological mapping (often visualized as a Harris Matrix) that sequences the different construction phases, additions, and demolitions of a historical building over centuries,.

Duration & Material

Duration · 2 to 4 weeks of structural observation and matrix generation

Material · Architectural blueprints, photogrammetric meshes, Harris Matrix diagrams, historical archives

Reference case

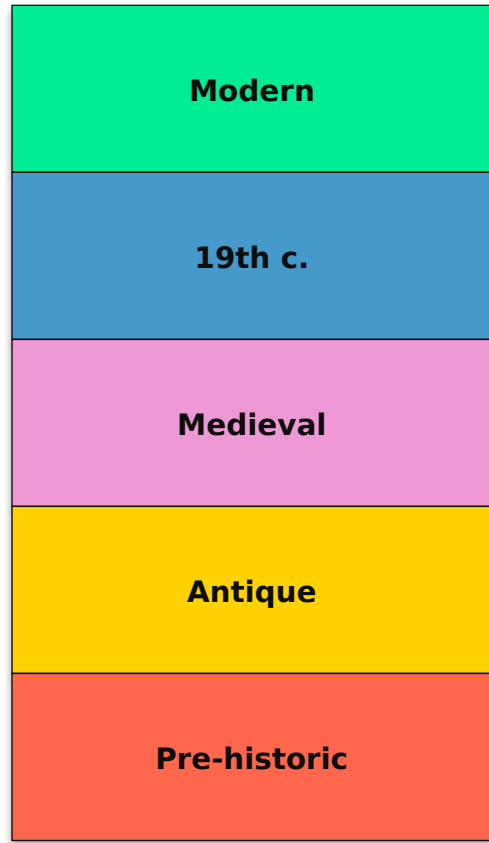

The Shawbak Castle project utilized dense photogrammetric point clouds linked directly with an archaeological database. By applying chronotypology and the Harris Matrix, researchers classified the different masonry units (USM) across the medieval settlement. This stratigraphic analysis provided an exact timeline of the castle's evolution, fundamentally guiding the subsequent interpretation and restoration design,.

Suggested agenda · Brief (10 min) > Method walk-through (15 min) > Animation canvas (60-90 min) > Harvest (20 min)

Vertical stratigraphy · eras × interventions

Duration
2 to 4 weeks of structural observation and
matrix gener...

Disturbances

Harvesting our *learnings*

After running the canvas, capture three layers of insight.

What inspires me

Stand-out signals, surprising stories, ideas to remember

How to apply it here

Concrete adaptations to our context, our team, our constraints

What we need to be autonomous

Skills, allies, resources, decisions still to secure

Each participant fills a copy. Then debrief together to surface patterns and next steps.
