Preparing the workshop · *Buffer zone management plan*

G3 · Proof of Anchoring

Why this tool matters

Guarding the breathing room of a monument; ensuring that the historic center is not choked, shadowed, or diminished by the aggressive skyline of unregulated real estate capital.

Evidence we produce

A statutory planning document that restricts building heights, materials, and land uses in the areas adjacent to a heritage asset to protect its visual and functional integrity.,

Duration & Material

Duration · 6 to 12 months for drafting and legal adoption

Material · Spatial zoning maps, visual impact assessment tools, municipal policy frameworks

Reference case

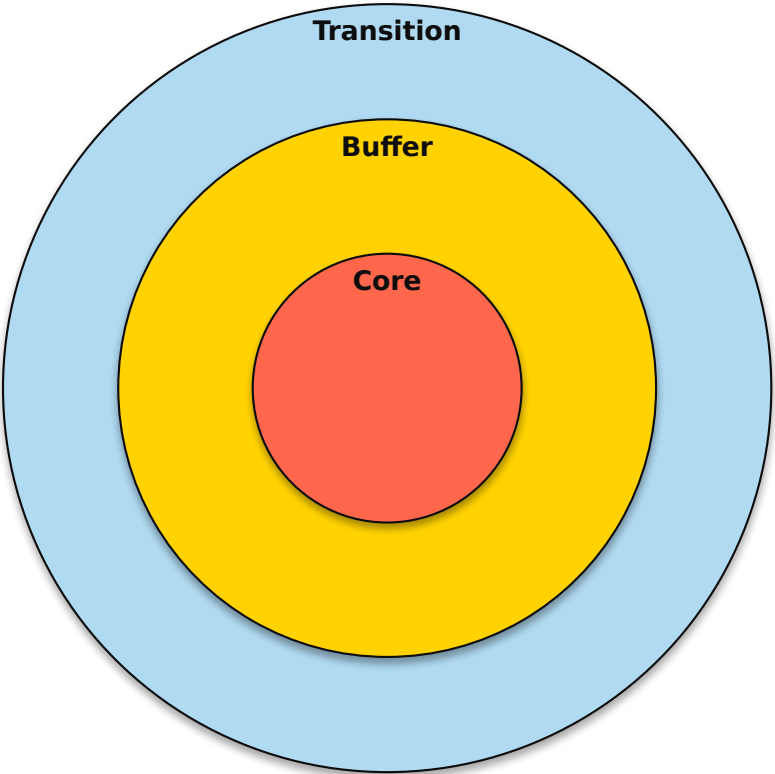

The Action Area Plan for the Buffer Zone of the Aapravasi Ghat World Heritage Property in Mauritius graded all buildings in the vicinity based on their significance. It established strict Planning Policy Guidance dictating building heights, facade materials, and the provision of public walkways. This ensured that new projects in the port area were executed under a single, integrated vision that protected the Outstanding Universal Value of the site.,,

Suggested agenda · Brief (10 min) > Method walk-through (15 min) > Animation canvas (60-90 min) > Harvest (20 min)

Core × buffer × transition zones

Duration
6 to 12 months for drafting and legal adoption

Zone diagram

Core

no new building, restoration only

Buffer

controlled, low impact

Transition

integrated, scaled

Outside

standard rules

Harvesting our *learnings*

After running the canvas, capture three layers of insight.

What inspires me

Stand-out signals, surprising stories, ideas to remember

How to apply it here

Concrete adaptations to our context, our team, our constraints

What we need to be autonomous

Skills, allies, resources, decisions still to secure

Each participant fills a copy. Then debrief together to surface patterns and next steps.
