Preparing the workshop · *15-minute city scan*

G1 · Proof of Impact

Why this tool matters

Demanding the right to time; ensuring that no resident is forced to lose hours of their life in transit just to access the basic necessities of human dignity.

Evidence we produce

Visual proximity atlases and spatial analyses demonstrating whether residents can access education, healthcare, and fresh food within a 15-minute walk or cycle.

Duration & Material

Duration · 2 to 4 weeks of data collection and spatial modeling

Material · GIS software, demographic census data, open-source mapping data (e.g., OSM)

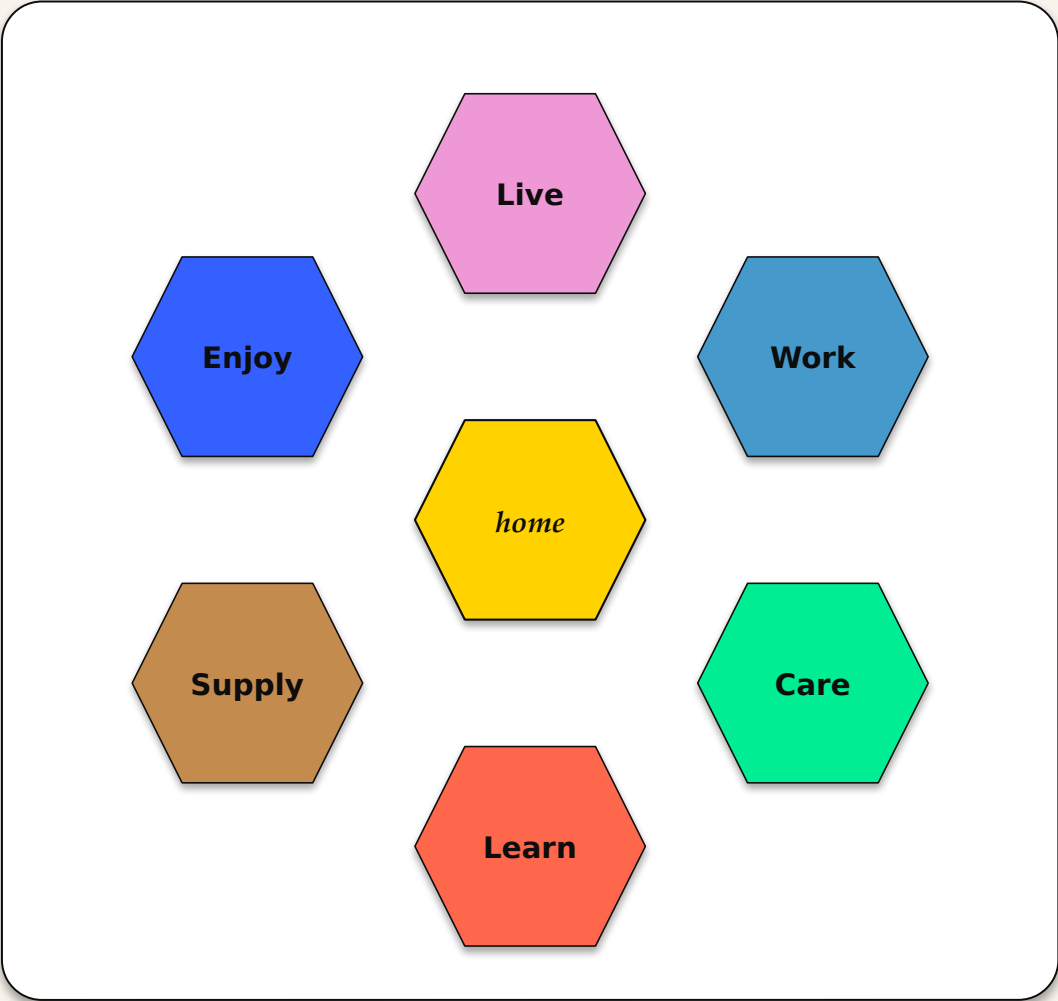

Reference case

During the FURNISH project at the Institut Barri Besòs in Barcelona, researchers utilized the Carer Cities platform to generate a "proximity atlas". This digital tool mapped health, educational, and everyday services within 5-, 10-, and 15-minute walking distances. The visual gradients allowed the school community to directly see the neighborhood's spatial inequalities and advocate for better local access.

Suggested agenda · Brief (10 min) > Method walk-through (15 min) > Animation canvas (60-90 min) > Harvest (20 min)

Six daily-life functions in 15 minutes by foot or bike

Duration
2 to 4 weeks of data collection and spatial modeling

Function audit

- ☐ Primary school
- ☐ Pharmacy
- ☐ Daily groceries
- ☐ GP / clinic
- ☐ Public transport stop
- ☐ Park / playground
- ☐ Community space
- ☐ Workplace cluster

Harvesting our *learnings*

After running the canvas, capture three layers of insight.

What inspires me

Stand-out signals, surprising stories, ideas to remember

How to apply it here

Concrete adaptations to our context, our team, our constraints

What we need to be autonomous

Skills, allies, resources, decisions still to secure

Each participant fills a copy. Then debrief together to surface patterns and next steps.
