Preparing the workshop · *Mobility labs*

G2 · Proof of Fit

Why this tool matters

Turning the asphalt into a classroom; refusing to accept traffic congestion as a permanent disease, and instead inviting the community to actively invent the cure.

Evidence we produce

Operational deployments of innovative transport solutions (e.g., zero-emission logistics, automated vehicles) rigorously tested in live traffic, supported by multi-stakeholder governance frameworks.

Duration & Material

Duration · 2 to 5 years of continuous operation and testing

Material · Transport vehicles, traffic monitoring sensors, data platforms, public-private partnership agreements

Reference case

The SafeCONNECT project in Saint Germain-En-Laye operates as a mobility living lab. It collaboratively tests the pedestrianization of city-centers and the deployment of flexible physical and digital tools. By using the live urban environment as a testbed, the lab generates a real-world shift towards sustainable travel modes while relaunching the local economy.

Suggested agenda · Brief (10 min) > Method walk-through (15 min) > Animation canvas (60-90 min) > Harvest (20 min)

Mobility lab · test · measure · scale

Duration
2 to 5 years of continuous operation and testing

User group

who is invited
representative mix

Mode tested

shared bike, AV shuttle...

Network

corridor vs district

Duration

days · weeks · months

Instrumentation × success metrics

User satisfaction			

Harvesting our *learnings*

After running the canvas, capture three layers of insight.

What inspires me

Stand-out signals, surprising stories, ideas to remember

How to apply it here

Concrete adaptations to our context, our team, our constraints

What we need to be autonomous

Skills, allies, resources, decisions still to secure

Each participant fills a copy. Then debrief together to surface patterns and next steps.
