## G3 · Proof of Anchoring

### Why this tool matters

Demystifying the opaque world of institutional finance, giving local actors the navigational tools to fund their civic ambitions and retain financial sovereignty.

### Evidence we produce

A visual funding map detailing available generic and thematic financial instruments, plotted against project maturity stages and eligible expenditure categories.

### Duration & Material

Duration · 3 to 4 weeks

Material · Financial instrument databases, project maturity scales, timeline mapping software

### Reference case

To implement Smart Specialisation Strategies, policymakers map European Structural and Investment Funds (ESIF) and plot them alongside tools like Horizon 2020 or European Investment Bank (EIB) loans. By visually charting these funding sources based on thematic scope and eligible beneficiaries, cities can blend grants with financial instruments to cover different project phases sequentially.
