Social / User

Preparing the workshop · *Open-data & vitality data*

G1 · Proof of Impact

Why this tool matters

Giving a measurable pulse to the city, transforming cold statistics into a readable heartbeat that reveals where civic life thrives and where it needs urgent care.

Evidence we produce

A localized data dashboard that translates raw datasets (such as footfall, network connections, and environmental metrics) into visual patterns highlighting areas of friction or vitality.

Duration & Material

Duration · 4 to 6 weeks to consolidate data and build the dashboard

Material · Municipal open data, GIS mapping software, data visualization platforms

Reference case

Urban planners utilize data-driven infrastructure evaluation to transform raw information into accessible visual insights. By tracking performance analysis data, such as carbon emission reductions, service accessibility, and economic network health, municipalities establish a baseline for strategic development and operational excellence.

Suggested agenda · Brief (10 min) > Method walk-through (15 min) > Animation canvas (60-90 min) > Harvest (20 min)

Open-data inventory × freshness × usefulness

Duration
4 to 6 weeks to consolidate data and build the dashboard

Demographics INSEE, census	Mobility GTFS, OD matrices	Environment air, water, noise
Economy jobs, businesses, real-estate	Public services school catchments, health	Geography GIS, parcels, BIM

Harvesting our *learnings*

After running the canvas, capture three layers of insight.

What inspires me

Stand-out signals, surprising stories, ideas to remember

How to apply it here

Concrete adaptations to our context, our team, our constraints

What we need to be autonomous

Skills, allies, resources, decisions still to secure

Each participant fills a copy. Then debrief together to surface patterns and next steps.
