Preparing the workshop · *Strategic Environmental Assessment (SEA)*

G3 · Proof of Anchoring

Why this tool matters

Elevating environmental care from a site-specific afterthought into a foundational principle of governance, ensuring that entire cities are planned with the health of the biosphere in mind.

Evidence we produce

A strategic environmental report that evaluates the cumulative effects of a proposed policy or plan, ensuring alignment with overarching sustainability goals.

Duration & Material

Duration · 6 to 12 months, running parallel to the plan-making process

Material · Regional environmental data, cumulative impact matrices, SEA Quality Assurance checklists

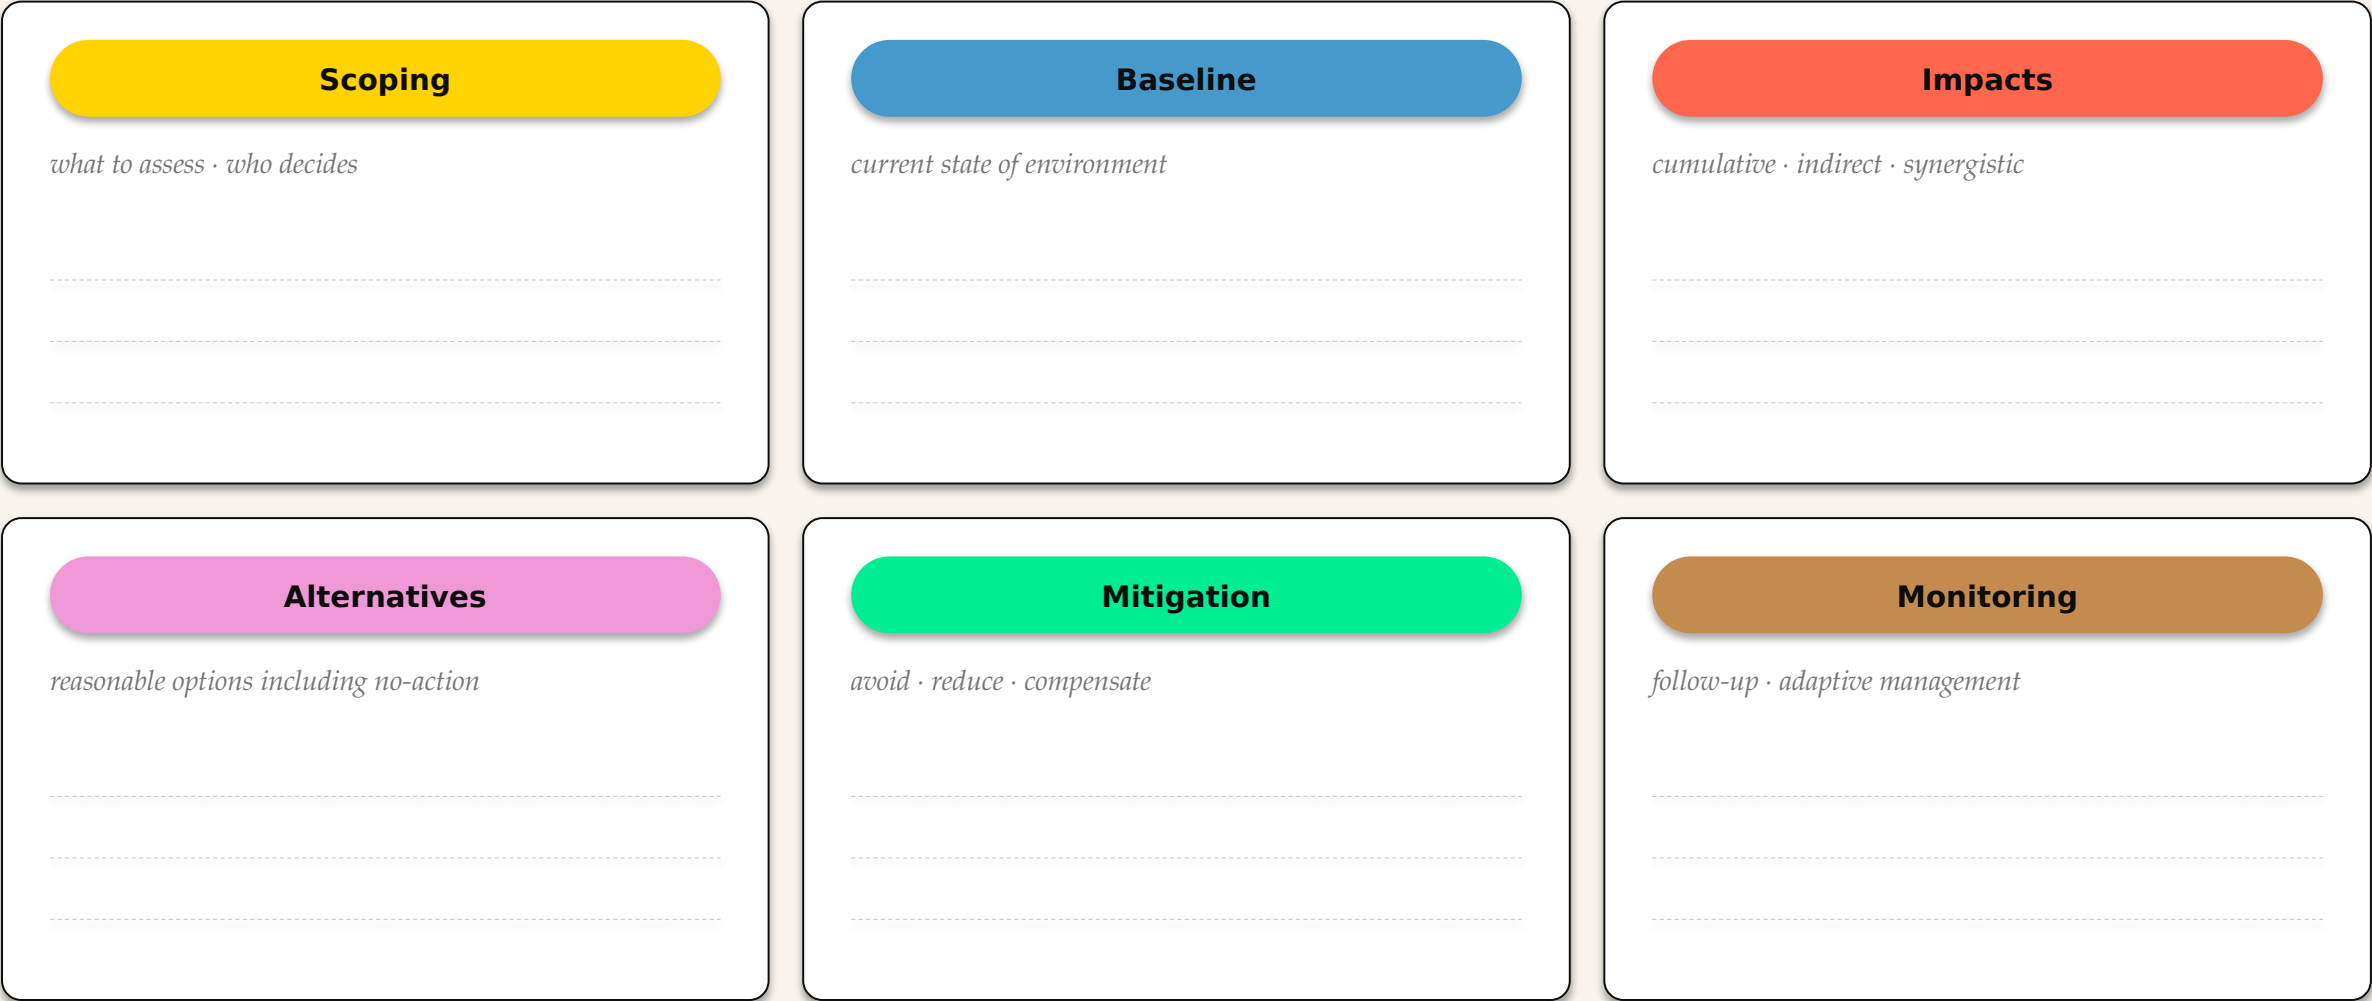

Reference case

The INTERREG Central Europe Programme 2021-2027 underwent a rigorous SEA to evaluate the potential environmental impacts of its cross-border funding strategy. By systematically assessing how the program's objectives would interact with regional biodiversity, climate mitigation targets, and public health, the SEA ensured that structural funding strictly promoted sustainable territorial development across multiple European nations.

Suggested agenda · Brief (10 min) > Method walk-through (15 min) > Animation canvas (60-90 min) > Harvest (20 min)

SEA · plan-level environmental assessment

Duration
6 to 12 months, running parallel to the plan-making pro...

Harvesting our *learnings*

After running the canvas, capture three layers of insight.

What inspires me

Stand-out signals, surprising stories, ideas to remember

How to apply it here

Concrete adaptations to our context, our team, our constraints

What we need to be autonomous

Skills, allies, resources, decisions still to secure

Each participant fills a copy. Then debrief together to surface patterns and next steps.
