Preparing the workshop · *BREEAM Communities / LEED ND / DGNB Urban*

G2 · Proof of Fit

Why this tool matters

Quantifying the invisible impact of bricks and mortar on human wellbeing, ensuring that building a new district is an act of environmental stewardship rather than mere extraction.

Evidence we produce

A scored certification roadmap (e.g., Bronze, Silver, Gold, Platinum) demonstrating compliance with comprehensive sustainability criteria across energy, transport, and community well-being.

Duration & Material

Duration · 3 to 6 months during the master planning phase

Material · Technical guidance manuals for BREEAM/LEED/DGNB, masterplan documents, certification scoring spreadsheets

Reference case

In evaluating urban sustainability, researchers compared these tools to assess the Meudon la Forêt neighborhood in France. The study proved that adopting a single global assessment tool as a universal solution is not feasible; instead, municipalities must select or adapt frameworks like BREEAM or DGNB based on their specific geographical context, recognizing that neighborhood patterns and local economic realities heavily influence the scores,,.

Suggested agenda · Brief (10 min) > Method walk-through (15 min) > Animation canvas (60-90 min) > Harvest (20 min)

Sustainability scoring · 10 categories

Duration
3 to 6 months during the master planning phase

Harvesting our *learnings*

After running the canvas, capture three layers of insight.

What inspires me

Stand-out signals, surprising stories, ideas to remember

How to apply it here

Concrete adaptations to our context, our team, our constraints

What we need to be autonomous

Skills, allies, resources, decisions still to secure

Each participant fills a copy. Then debrief together to surface patterns and next steps.
