G3 · Proof of Anchoring

Why this tool matters

Subverting the traditional mechanics of global finance to fund civic survival, turning the debt of the present into the ecological salvation of the future.

Evidence we produce

A certified Green City Bond framework outlining eligible projects, use of proceeds, and mandatory post-issuance environmental reporting.

Duration & Material

Duration · 6 to 12 months for framework preparation and issuance

Material · Climate Bonds Initiative (CBI) Taxonomy, Green Bond Principles, financial feasibility models

Reference case

Following the Climate Bonds Initiative (CBI) Taxonomy, municipalities issue green bonds by committing to strict emissions trajectories. For example, to certify commercial building upgrades for green financing, the city must mathematically prove the project achieves a 30% to 50% performance improvement against baselines, ensuring that borrowed capital directly funds verifiable decarbonization,.
